For years I was afflicted with Dry Tetter of the most obstinate type. Was treated by many of the best physicians; took quantities of mercury, potash and arsenic, which, instead of curing the Tetter, crippled me up with mineral poison and rheumatism. The Tetter continued to grow worse, and the itching almost made me crasy. In this condition I was induced to take Swift's Specific, and the result was a sationishing as it was gratifying. In a few months the Tetter was entirely well, the Mercurial Poison all out of my system, and I was a well man—and due only to Swift's Specific. All like sufferer should take it.

nearly ever since her birth with a skin disease, which I first diagnosed chicken-pox, but later found it to be some sort of ecsema; at any rate it resisted very stubbornly all the different treatments. I procured one bottle of Swift's Specific, and gave it to her in small doses three times a day, and in a short while had the satisfaction to see that she was entirely well. I am so well pleased with its effect on her that I shall not only use it in my practice, but I shall administer it to my other children and take it myself.
